

Hi Myself BALAKUMAR

I am from madipakkam Chennai. I am having overall 3.7yrs of experience as a Test Engineer in Automation and Manual Testing which includes years of experience in Selenium frameworks and manual Testing and also, I have Experience in API-manual.

I am working for IMPEL INFOTECH PRIVATE LIMITED . I joined this company 3.7years back as a fresher. During the last 3.7 years I have been involved in 2 projects where I was a part of testig team.

I have been on working different domains like Retail and E-commerce
have good knowledge on Automation tools Selenium.

I worked with multiple frameworks like TestNG, Maven, cucumber BDD and also, I have exp with data driven concept.

tools I have working in Git, Jira, Jenkins and API-postman

we are Following Agile methodology, I have participated in many ceremonies, sprint planning meeting, review Meeting, daily stand-up call

Also, I have given some demo to the client.

I have participated in designing the project framework and will update and enhance the framework functions, when needed. I have created 70% of the Framework.

I got to work in detail in test execution.

As a tester, I have good experience on writing test cases and test Scripts, preparing traceability matrix and writing bug reports.

I have successfully performed testing like Sanity testing, smoke testing, regression testing etc

I will document the Test results and log defects for Failed cases.

If there is any bug, it will be reported to the developer team for the correction in the Defect with the help of Tracking tool Jira.

I will co-ordinate and follow up with developer team and test Team in Resolving issues.

once the Bug fixed, I will retest again

coming to the calls,

I will attend the daily agile Meetings like daily scrum call.

Apart from that, I will have demo meeting once the story or module completed.

I will Interact with the client-side people and will update the status in the daily basis

I will maintain our code in git repository and will push the code whenever the Updating the scripts as per test plan.

we are using Jenkins as CI/CD tool, so will schedule a job and get the report once Execution Completed continuous integration, continuous delivery, and continuous deployment.

I can also Configure the Jenkins Jobs for initial setup for my project.

Reports:

I will prepare Daily, weekly (Sprint end Report) and Monthly status reports.

I will Review and analyse the test report and based on that, will prepare the test summary report.

Then Finally I will close the Jira tickets or Stories with the Confirmation of team lead.
